

Oncosem Environmental Statement

At Oncosem, we prioritize environmental sustainability while operating in the field of oncological systems and health technologies. We aim to contribute to a healthier future by minimizing environmental impacts in our production processes and product usage.

- 1. Energy Efficiency and Waste Management:** We continuously improve energy efficiency and reduce waste in our facilities.
- 2. Sustainable Supply Chain:** We collaborate with our suppliers to encourage the use of eco-friendly materials and sustainable practices.
- 3. Green Innovation:** We lead green innovation in the healthcare sector by developing environmentally conscious technologies and products.
- 4. Engaging Our Employees and Communities:** We educate and raise awareness about environmental issues and sustainability among our employees and communities.
- 5. Transparency and Compliance:** We embrace transparency by regularly publishing reports on our environmental performance and fully comply with environmental laws.

By taking care of the century-old olive trees on our land belonging to our company, we contribute to air quality by absorbing carbon dioxide from the atmosphere and producing oxygen through photosynthesis. One of the most important features of olive trees is that they are drought resistant and water saving plants. In addition, it supports both nature and its employees with its high antioxidant content by growing aronia, which is a part of natural ecosystems, helps prevent erosion and improves soil quality.

As Oncosem, we take responsibility for a sustainable future and continue to be a pioneer in eco-friendly practices in the healthcare sector.
